**fiberglass reinforced plastic**  
FOR RECREATIONAL VEHICLES

Go RVing®

**Crane Composites, Inc. has set the standard for premium, low maintenance, and long life - meeting the needs of the Recreational Vehicle industry.**

Crane Composites panels are manufactured with either a smooth gel-coat or embossed finish, providing for highly attractive finishes on motor homes and travel trailer units. Crane understands the importance of RV owners place on the ease of maintaining the appearance of their units.

## **THE NAMES YOU RECOGNIZE,** **the products & service you deserve**

A durable, high-gloss fiberglass finish. It has an advanced resin system engineered to be compatible with today's variables associated with a total composite wall and roof product assemblies.

- Manufactured with a smooth gel-coat, providing attractive, automotive finishes
- Available in a standard surface finish or with a less fiber show enhanced finish
- Scratch and abrasion resistant; withstands dents, dings, mold, and mildew

Filon Select is a lightweight panel that significantly reduces unit gross weight as compared to traditional lauan substrate and frp laminated panel with a premium upgraded look.

- Outstanding fiber free high gloss finish
- Lightweight fiberglass composite
- New technological process
- Highly scratch and abrasion resistant

A well-engineered, high gloss, composite fiberglass sidewall panel for the recreational vehicle industry. The Noble Classic panel is the most popular exterior finish choice by a broad range of manufacturers throughout the industry!

- Premium, high-gloss surface
- High-grade construction for optimum sidewall performance
- State-of-the-art lamination process
- Designed for both laminated and free-hung walls

An all-composite, wood-free exterior panel with superior surface and weathering performance. Noble Select is designed for both laminated and free-hung wall applications and is preferred where full-body paint is required.

- No wood fibers, 100% formaldehyde free
- Superior gel-coat for paints and graphics
- High Strength and durability to withstand extreme weather and road conditions
- Up to 20% lighter than wood-backed sidewalls

## CHOOSE THE RIGHT PRODUCT

### Crane Fiberglass vs. Competitive Products

# FLEXROOF

Sunguard FlexRoof panels are specifically engineered to be a one-piece, laminated roof panel finish for recreational vehicles and campers. Its flexibility allows the panel to bend around the radius where the roof meets the sidewall, resulting in a seamless, no-leak roof system.

- Available in a highly scratch and abrasion resistant embossed finish or smooth gel-coat finish
- UV inhibitors are added to provide superior weathering performance
- Hard-abuse resistant finish resists tearing - avoiding water damage

# DOOR SKINS

Filon Class C (ASTM-E84) door skins gel-coated fiberglass reinforced composite panels are made from high-quality thermoset polyester resins and UV inhibitors. The surface is available with a textured or smooth finish is aesthetically pleasing. Panels are suitable for use as a permanent exterior that may be exposed to the elements in a wide variety of climates.

## GIVE THEM MORE OF WHAT THEY RV FOR.

To get more out of every mile and every moment, choose **Genuine CRANE Fiberglass** panels.

Founded in 1954, Crane Composites is the world's leading producer of fiberglass products for the RV industry. From surfboards to seaplanes, fiberglass has a well-earned reputation for combining high performance with high style. Featuring smooth gel-coated surfaces, our fiberglass exteriors are "real world" tested to deliver unmatched durability and long-lasting beauty.

- More rigid, solid construction for greater impact-resistance and fewer dents and dings.
- Integrated gel-coated color surface won't chip or crack.
- Stands up to UV rays for long-lasting beautiful color.
- Won't rust - period.
