DECORATIVE WALL PANEL ACCESSORIES

Enhance the look of StructoDecor wall panels with several attractive seam treatment options.

Vinyl Moldings

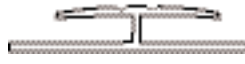

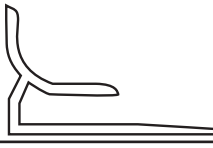

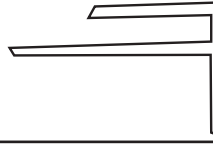

For professional looking panel installations, and maximum moisture sealing effectiveness, use StructoDecor Vinyl Moldings. A division bar especially designed with a beaded finish is also available to complement the beaded panel.

Decor Trims

The innovative design of DecorTrims incorporates dual durometer technology - a rigid, PVC base and a flexible PVC top, providing a coordinated look for tiled grout lines or a textured frp finish.

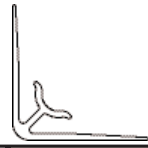

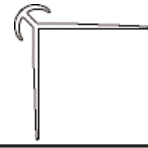

Beaded Panel Molding
