

PI 20

The First FRP Panel with
20% Post-Industrial Recycled Content

FRP WALL & CEILING PANEL
MANUFACTURED WITH 20%
POST-INDUSTRIAL RECYCLED CONTENT

Durable

Engineered for high traffic environments; FRP is durable, cleanable and will not rot, rust, mold or mildew.

Sustainable

Made with 20% Post Industrial Recycled content, the PI 20 panel will help contribute to LEED Credits for your project.

Easy To Install

With similar physical properties of standard FRP Panels PI20 is easy to install. Use our environmentally friendly polypropylene moldings for a complete moisture resistant installation.
