

Building Product Certification Statement

USDA/FSIS Requirements

Crane Composites, Inc. certifies that all Crane Composites FRP panels and FRP laminated panels meet the following USDA/FSIS requirements:

1. Crane Composites FRP panels and FRP laminated panels have a finished outer surface material that is rigid, durable, non-toxic, non-corrosive and moisture resistant. The panels are a light solid color such as white with a smooth or embossed surface that is easily cleaned.
2. Crane Composites FRP panels and FRP laminated panels do not contain any known carcinogen, mutagen, or teratogen classified as hazardous substances, heavy metals or toxic substances, antimicrobials, pesticides, or substances with pesticidal characteristics.
