

DESIGNS | TOUCH-UP SOLUTIONS

FORM 7507

Please use the DESIGNS / Sherwin-Williams Color Chart below if minor scratch touch up is needed. All Sherwin-Williams colors should be available in a sample quantity. Some patterns may require more than one color. The Sherwin-Williams ColorSnap App may also be used to determine the color needed for the repair.

In some cases our recommended colors may not match the area of the panel you would like to repair. If you prefer you may use the Free ColorSnap App from Sherwin-Williams. Take a photo of the area near the repair and use the application to select a Sherwin-Williams color. The application download page can be accessed by scanning the QR code to the right.
