

SCUFF PLATE

dry/refrigerated trailers, truck bodies

SUPER TOUGH SCUFF

Kemlite® Scuff Plate panels are a high-impact, durable, light-weight product that are more cleanable, more stain resistant, and more abrasion resistant than competitive plastic materials and alternative solutions such as wood and aluminum.

scuff plate purpose

Kemlite® Scuff Plate is specifically designed and formulated for the use as a scuff plate to protect your sidewalls from forklift and pallet damage in high abuse or impact areas within dry van & refrigerated trailers and truck bodies.

scuff plate benefits

- Minimizes damage caused by forklift, pallets, crates, and cargo
- Protects against dents and tears
- Equipped w/ unique Surfaseal™ Technology for unmatched cleanability and stain resistance
- Superior performance at a fraction of the weight and thickness of alternative materials

scuff plate features

- STI** 0.240" Thick, Textured Embossed Panel
- EGAT** 0.145" Thick, Textured Embossed Panel
- LTR** 0.120" Thick, Textured Embossed Panel

- **EGAT:** 12", 18", 24", 48" | Other sizes available upon request

scuff plate designed to last

Kemlite® scuff plate is designed to take the abuse that is inevitable from loading and unloading your trailers and truck bodies. Scuff is the first barrier, the sacrificial layer... for that reason, we know it needs to last. Kemlite® scuff plate will act as that barrier as evidenced by the image below. The trailer pictured below has been in-service for 8 years and our scuff plate has been along for the ride.

*This product contains Surfaseal™, a unique surface to Crane Composites. This protective finish ensures that our panels will stand up to harsh conditions while maintaining a clean and sanitary surface.
