

Crane Composites' City Works Brings Urban Edge to Wall Panels

Channahon, IL (March 29, 2019) — Crane Composites is introducing a metropolitan, yet weathered, style to commercial wall panels with the new City Works collection. Part of the company's DESIGNS fiberglass-reinforced plastic (FRP) wall panel line, City Works delivers unique patterns influenced by commuter touch points people see on their way to work. The collection features patterns that mimic elements of metal, stone, wood and concrete.

Inspired by commuter icons around the United States like bridges, by-ways, ferries and subways, City Works includes 10 photography-based patterns: Colfax, Union, Skyway, Staten, Burlington, LaSalle, Sumner, Franklin, Mover, and Westpark. The panels are available in 4'x8' and 4'x10' sizes.

With endless options, Crane Composites' DESIGNS wall panels go way beyond the traditional white bumpy board. They add unique color, depth and dimension to walls, without sacrificing durability and lifecycle costs. All DESIGNS products provide stain, abrasion and moisture resistance for walls. They are mold and mildew free and meet USDA/FSIS requirements. Plus, the panels are easy to clean and easy to install.

To view the City Works collection and to request samples, go to: cranecomposites.com/cityworks. For more information on Crane Composites' wall panels, visit CraneFRP.com or subscribe to Crane Composites' social medial channels.

About Crane Composites

Crane Composites Inc., a subsidiary of [Crane Co.](#), is the world's leading provider of fiber-reinforced composite panels.
