

Introducing Wall Protection Collection for Serene & Tranquil Environments

CHANNAHON, IL, October 6, 2017 – Crane Composites, the world's leading provider of fiberglass reinforced plastic (FRP) materials, is pleased to announce 13 new colors in 2 finishes within the new VARIETEX Sands Collection. The new natural colors are drawn from the Earth's beaches. Just as these natural wonders beautifully protect shorelines, our durable wall coverings will gracefully stand up to the rigors of most commercial buildings. The Sands Collection color palette was generated in part by design industry professionals to help create serene and tranquil environments. "The new color palette expands the next generation in resilient wall coverings," said Drew Franzen, Vice President of Crane Building Products. "Our Sands Collection provides an aesthetically pleasing look without sacrificing durability and lifecycle costs."

VARIETEX helps to create a sustainable space with a wide range of stylish finishes and colors, while still meeting the sanitary requirements of even the toughest commercial environments. Go beyond traditional surfaces with Crane resilient wall panels as wainscoting, accent walls, counter facades, and many other applications. Use VARIETEX in any interior setting that receives abuse, yet needs to remain attractive.
