

Kemply® laminated panels with Surfaseal®

KEMPLY FLUTED POLYPROPYLENE WITH GLASBORD EMBOSSED | WHITE (85)

For high moisture areas such as a car wash use Crane Composites fiberglass reinforced plastic (FRP) wall panels. Our Kemply polypropylene wall panels are the ideal solution for an easy to clean white surface.

Count on Crane Composites laminated wall panels for a moisture and corrosion resistance surface and added structural strength. Kemply Polypropylene panels are fabricated by laminating a Crane Composites Glasbord panel to a fluted polypropylene substrate. With all the durability and hygiene benefits of our Glasbord products, Kemply panels are just as easy to install – they can be applied directly to a wall stud. Glasbord with Surfaseal is extremely moisture-resistant and non-porous. The Surfaseal film finish, found only on Glasbord, provides a barrier that's highly resistant to impact and scratching. The sturdy panels provides a faster installation by applying directly to a wall stud with a 5-year limited warranty. The end result is a simple, sanitary solution that's designed to last.

APPLICATION **Car Wash**

high moisture area solutions

product line

Kemply with Fluted Polypropylene Laminated to Glasbord Embossed or Smooth in Class A or Class C Fire Rating per ASTM E-84 (PWI, PIF, PSIF, FX, FSI)

ceiling panels with Glasbord + Kemply + Sanigrig

more than 65 years

A global leading provider of resilient wall and ceiling coverings. Kemlite® was established in 1954 and the company changed names to Crane Composites in 2007. Crane Composites is headquartered in Channahon, IL and all our products are manufactured in the United States. We work with hundreds of distributors, ensuring our products are easily accessible and readily available to our customers.

greenguard certified

All Crane Composites wall and ceiling coverings have earned GREENGUARD Certification for low chemical emissions, issued by UL Environment. This certification reflects our dedication to improving the quality of our products, while using low-emitting materials in their construction.

Thanks to their environmental benefits, the use of Crane Composites products may also contribute to earning LEED® certification.
