DISCOVER THE DIFFERENCE
frp surface systems

Recreational Vehicle Panels **FILON**® Coilable Exterior Sidewalls

frp Fiberglass Reinforced Panels

why **frp**? why **FILON**®?

sidewalls vs the elements

When it comes to RVs, what's on the outside counts! That's why Crane Composites FILON exterior sidewall panels are specifically engineered to provide unsurpassed performance and beauty.

dependable performance

Count on Crane FRP panels for extremely strong, durable panels that provide resistance to mold, mildew, bacteria growth, stains and chemicals. We deliver quality products on time and offer short lead-times to accommodate our customers' schedules.

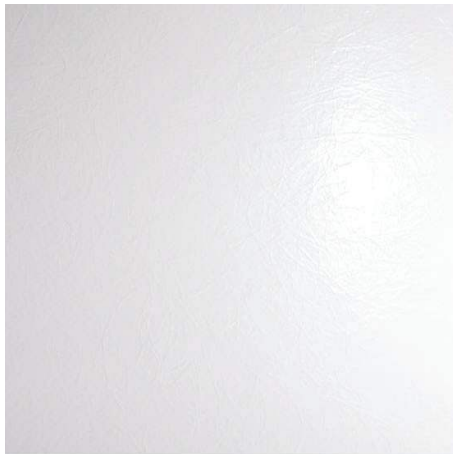

leading the way

As the leading manufacturer of fiberglass products for the RV industry, we stand behind everything we do. From product information and service, to testing and technical support, all Crane products are backed with the resources you need, when you need them.

The Genuine **FILON**[®] Difference

Crane began their legacy in the RV market over 30 years ago as the first to introduce fiberglass into the market and as the one and only manufacturer of genuine FILON fiberglass. Our lineup of FILON coilable exterior sidewall panels continues to set the standard for the industry. Composed of an advanced resin system and fiberglass, all Crane Composites FILON RV exterior sidewall panels provide resistance to dents, dings, mold, mildew and bacteria growth. The exclusive Crane Composites gel-coat surface is highly scratch and abrasion resistant, adding years of life to an RV. Panels come in a variety of finishes, thicknesses, colors and sizes for a variety of applications. It's only FILON, if it's Crane!

30 Years of History & The Next Generation Has Arrived

POLAR WHITE (8016)

POLAR WHITE (8211)

POLAR WHITE (8410)

G3

- Industry standard for nearly three decades, FILON G3 stands for 3rd generation
