RE: Color Drift of FRP Panels

To Whom It May Concern;

Panel color can deviate from production run to production run. No two production runs will be exactly the same. Please note this when ordering panels for a specific job.

Typically, FRP panels go through a natural color change for up to 120 days. At the end of this cycle the panels will reach a predictable color level.

Please feel free to contact me directly at 815-467-8939 with any additional questions.

Thank you for your inquiry.

Sincerely,

A handwritten signature in black ink that reads "Karen A. Nebe".
